The Future of Life-Cycle Saving and Investing

October 1, 2007

Life-cycle finance is the branch of finance that affects everyone. It deals with questions faced by individuals seeking to get ahead: How much should I save? What should I invest in to build wealth? When I retire or if I become unemployed, how much of my savings can I spend each year? Is there something I can do to make sure I do not outlive my savings? What can my spouse and children expect to inherit?

Despite the urgent needs represented by these questions, financial researchers have devoted relatively little attention to most of them. “What should I invest in?” has received the lion’s share of the attention, producing a well-accepted body of theory about how to build optimal portfolios.

The work on understanding life-cycle finance has fallen to professors of finance, insurance professionals, risk managers, and investment managers and other financial institution executives. Lawmakers, lawyers, regulators and accountants also have played major roles, as have pension plan executives — a broad category that includes corporate managers, government officials and labor union representatives.

To further research in the field, the Research Foundation of CFA Institute teamed up with Boston University and the Federal Reserve Bank of Boston to present a conference exploring the frontiers of life-cycle finance. This volume presents the proceedings of this event.

This document is not intended to, and does not relate specifically to any investment strategy or product that AQR offers. It is being provided merely to provide a framework to assist in the implementation of an investor’s own analysis and an investor’s own view on the topic discussed herein.

This document has been provided to you solely for information purposes and does not constitute an offer or solicitation of an offer or any advice or recommendation to purchase any securities or other financial instruments and may not be construed as such. The factual information set forth herein has been obtained or derived from sources believed by the author and AQR Capital Management, LLC (“AQR”) to be reliable but it is not necessarily all-inclusive and is not guaranteed as to its accuracy and is not to be regarded as a representation or warranty, express or implied, as to the information’s accuracy or completeness, nor should the attached information serve as the basis of any investment decision. This document is not to be reproduced or redistributed to any other person. The information set forth herein has been provided to you as secondary information and should not be the primary source for any investment or allocation decision. Past performance is not a guarantee of future performance. Diversification does not eliminate the risk of experiencing investment losses.

This material is not research and should not be treated as research.
